

## Summary

---

Final-year Computer Science student with strong foundation in full-stack application development using Java and modern frontend frameworks. Experienced in building, integrating ML models, and writing clean, maintainable code following SOLID principles. Familiar with Java, microservices architecture, and Agile development practices. Passionate about building scalable and reliable software systems.

## Education

---

**Vellore Institute of Technology (VIT-AP)**  
*B.Tech in Computer Science*

2022 – 2026  
CGPA: 8.80

## Projects

---

### Personal Finance Tracker

Java, SQL, HTML, CSS, JavaScript

- Developed a web-based application to track income, expenses, and savings with categorized financial insights.
- Designed backend logic using Java and implemented structured data storage using SQL.
- Built interactive dashboards to visualize spending patterns and monthly trends.
- Applied Object-Oriented Programming principles for modular and maintainable code design.
- Implemented input validation and error handling to ensure data accuracy and reliability.

### Predicting Fleet Fluid Mechanism

Machine Learning, Flask

- Built predictive models and exposed functionalities via web services for integration.
- Designed backend systems with focus on modularity and maintainability using OOP principles.
- Worked with structured data and applied preprocessing using analytical techniques.
- Collaborated and iterated independently to enhance model accuracy and system reliability.

## Publications

---

### Predicting Student Dropout Rates using Socio-Economic Indicators

- Analyzed district-level datasets to identify patterns influencing student dropout rates.
- Applied machine learning models to support data-driven decision-making.
- Focused on explainability and interpretation of model outcomes.

## Certifications

---

- Oracle Cloud Infrastructure Generative AI Professional — July 2025
- Artificial Intelligence using Google TensorFlow — July 2024
- Corizo Web Development — August 2024

## Skills

---

- **Programming Languages:** Java, Python
- **Data & Analytics:** Data Analysis, Machine Learning
- **Web & Application Development:** HTML, CSS, JavaScript
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab
- **Databases:** MySQL
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)
- **UI/UX:** Canva, Figma, Power Point
- **Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Agile Mindset, Attention to Detail
